

Petition to establish a National Strategy to combat plastic pollution

We, the undersigned residents of Canada, draw the attention of the House to the following:

- **THAT** plastics make their way into various bodies of water via storm drains, global ocean currents and consumer disposal and industrial waste;
- **THAT** plastics in our oceans, lakes, rivers and other bodies of water pose a serious threat to the health and well-being of sensitive ecosystems, wildlife, and communities and individuals;

THEREFORE we call on the Government of Canada to adopt a national strategy to combat plastic pollution in aquatic environments, and to work with the provinces, municipalities, and indigenous communities to develop this strategy.
